

Powering a World That Never Stops

WASION AMERICAS, INC.

Wasion Americas, Inc. (WAI), headquartered in Raleigh, North Carolina, partners with utilities across North America to deliver advanced, standards-compliant technology solutions that enhance grid reliability, efficiency, and safety.

COMMITMENT TO EXCELLENCE

We are dedicated to bringing value to utilities by delivering the highest quality products on time and always at a competitive price.

Designed, built, and tested to meet all ANSI, UL, IEEE and DOE standards, plus additional external testing that goes beyond current standards to ensure our products perform.

DISTRIBUTION TRANSFORMERS

WAI transformers are engineered, tested, and delivered with precision to operate in the toughest environments. Built on standards with reliability utilities can count on, our products are great for residential, C&I, agricultural and grid modernization applications.
